

I do not know why you have taken the position of opposing the Leiber bill. I think that the expertise of OEHHA would be more than welcome in the PEL process. Cal/OSHA employs no toxicologists, epidemiologists, or even physicians. How can Cal/OSHA perform risk assessments? OEHHA is an impartial state agency that does risk assessment for a living. Certainly workers deserve the same protections that other residents of California do.

I am a member of AIHA - NCS. I am very disappointed in the CIHC.
